LOCATION

Our Garden Center is easy to reach as we are located on the Boston-Worcester Turnpike, Route 9, at the Natick-Framingham town line, opposite Shoppers World.

PRICES

The articles in the following list will be furnished at the annexed prices only when the quantity specified, of any given variety and size, is taken.

Specimens personally selected by the purchaser or his representative (or specially selected by us at his request) will be priced according to their individual values.

The prices are for the stock F.O.B. Framingham and are subject to change without notice.

The prices are effective January 26, 1961.

TERMS

Our terms are cash. Charge accounts, for 30 days credit, may be opened upon receipt of satisfactory credit references — allowing us time for investigation. All accounts unpaid after due date will be subject to sight draft without further notice. C.O.D. express shipments will be made (with collection charges added to the bill) only when order is accompanied by a deposit of at least 25 per cent of the amount of the bill.

Wyman's GARDEN CENTERS, Inc.

Wyman's FRAMINGHAM NURSERIES, Inc.

Our 70th Year

This is our 70th year in the nursery business. The years have witnessed a great many changes, particularly the last few. Our business has expanded from a retail and wholesale nursery to one covering the whole horticultural and garden industry.

In 1948 we built Wyman's Garden Center, the largest and most complete garden supply store in New England. It was our aim to make available to every home owner all types of garden plants and supplies and at the same time give better service to our customers.

We devote our 135 acre nursery, north of Shoppers World on Route 30 in Framingham to the growing of plants for Wyman's Garden Centers, Inc. Our 129 acre nursery in Virginia propagates plants to be sent to Framingham for growing on for future sales. In addition, it will handle our wholesale nursery business, as we grow quantities of plants for other nurseries in eastern United States.

During the winter of 1957, we enlarged our Framingham Garden Center. We have increased the store area, added new modern offices, and a new air-conditioned auditorium—The Flora M. Wyman Auditorium—which will seat over 200 people and has a fully equipped kitchen. It is available to all groups, Garden Clubs and others interested in all phases of horticulture.

Our plans for the future provide for many improvements and additions in our facilities in order that we may serve you better. They will be completed as rapidly as possible.

MASSACHUSETTS NURSERYMEN'S ASSOCIATION ADOPTS NEW TRADE MARK

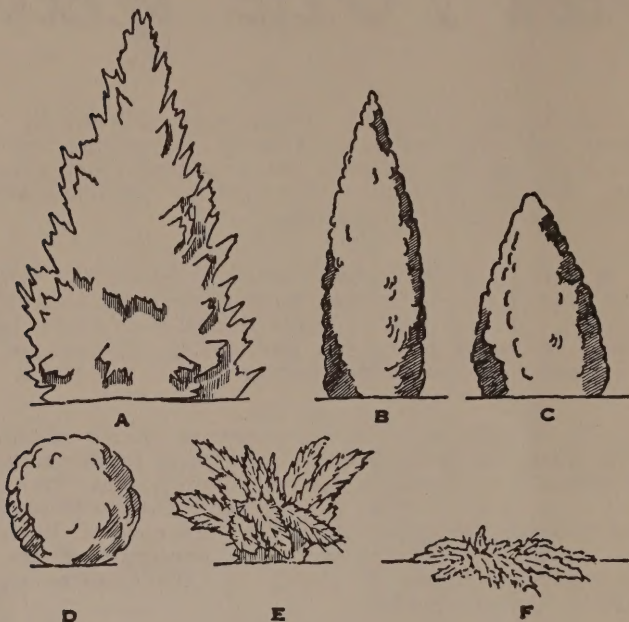

Now the consumer public can identify quality products and services with those firms who display this sign. The members of the M.N.A. are dedicated to providing the highest quality products and the best service possible.

Highly advertised so-called "bargains" may prove to be a big disappointment when the plants are received since the quality of nursery stock varies greatly.

You can buy with confidence if you patronize a member of the M.N.A.

Look for this Trade Mark.

TYPES OF EVERGREENS

To enable us to give accurate, brief, descriptions of Evergreens, we classify them into six types shown above.

- A. Large, roughly conical, medium to coarse texture.
- B. Narrow conical to columnar, medium to fine texture.
- C. Broad conical, medium to fine texture.
- D. Globose, including elliptical and flattened globe.
- E. Spreading, bush-form, not prostrate.
- F. Flat, prostrate or procumbent.

RATES OF GROWTH

These also vary, but we give an approximate average rate per year, also the key letters used in the code.

- VR—very rapid—over 18 inches.
- R—rapid—12 to 18 inches.
- M—medium—8 to 12 inches.
- S—slow—4 to 8 inches.
- VS—very slow—under 4 inches.

TRANSLATION OF DESCRIPTIVE CODE

We condense the above information into code form as: B—M. Reference to the above explanation indicates that the tree described is a narrow cone or column, and grows from eight to twelve inches a year.

EVERGREEN TREES

Our Evergreens have the quality necessary to provide excellent IMMEDIATE EFFECT — and heavy root masses to promote TRANSPLANTING SUCCESS.

We dig our Evergreens with a ball of the earth in which they are grown, and wrap them in burlap WITHOUT additional charge.

TYPES OF DECIDUOUS TREES

- A. Narrow columnar habit, branches erect.
- B. Oval or elliptic head, branches ascending.
- C. Conical head, branches ascending.
- D. Broad rounding head, branches spreading.
- E. Irregular habit, branches irregularly ascending or spreading.
- F. Branches ascending, arching, even drooping near ends.

Certain types such as B, C and D do not always show the characteristics depicted when young, but do so as they mature.

MAXIMUM HEIGHTS

These vary under different conditions.

The figures given represent an average mature growth, not the extremes.

RATE OF GROWTH

VR—very rapid—over 4 feet.

R—rapid—3 to 4 feet.

M—medium—2 to 3 feet.

S—slow—1 to 2 feet.

VS—very Slow—under 1 foot.

TRANSLATION OF DESCRIPTIVE CODE

We condense the above information into code form as: B—18'—M. Reference to the above explanation indicates that the tree described is a narrow cone or column, a usual maximum height of eighteen feet, growing from two to three feet a year.

DECIDUOUS SHADE AND ORNAMENTAL TREES

For trees dug bare-rooted, deduct Ball
and Burlap (B&B) charges as follows:

5 to 6 ft.....	1.25 each
6 to 8 ft.....	2.00 each
8 to 10 ft.....	3.50 each
10 to 12 ft.....	5.50 each
12 to 14 ft.....	10.00 each

5 to 6 ft. B&B.....	8.95
---------------------	------

DECIDUOUS FLOWERING AND ORNAMENTAL SHRUBS

TYPES OF DECIDUOUS SHRUBS

- A. Stems erect, moderately branched, usually narrow.
- B. Stems spreading, then ascending or erect, moderately branched.
- C. Few stems, many branches.
- D. Many stems, few or no branches.
- E. Stems ascending or erect, arching, finally drooping.
- F. Low, spreading, sprawling.

Since few Deciduous Shrubs have a definite rate of growth, or constant ratios of height to breadth, we omit those items, but indicate the types.

SHRUBS AND VINES

Varieties marked B&B or container grown include root ball. However, if bare root plants are desired, deduct 10% from prices listed.

AZALEA

Admittedly the finest of the Deciduous flowering shrubs, Azaleas give some of our most delicate flower colors, as well as flowering range from early April to early July.

AZALEA arborescens

Sweet Azalea

D—S. Broad round habit. Flowers white inside, rich pink outside, red stamens, fragrant, late June.

Each

15 to 18 in. B&B.....	5.95
18 to 24 in. B&B.....	7.95
2 to 2½ ft. B&B.....	9.95

AZALEA—continued

calendulacea

Flame Azalea

A—Varying hues of red, orange, yellow; early June.

15 to 18 in. B&B.....	4.85
18 to 24 in. B&B.....	5.85
2 to 2½ ft. B&B.....	6.95

gandavensis

Ghent Azalea

A—Flowers early June, attractive mixed colors, light to golden yellow, light pink, cream and orange. One of the best for the area.

15 to 18 in. B&B.....	4.95
18 to 24 in. B&B.....	5.95
2 to 2½ ft. B&B.....	7.50
2½ to 3 ft. B&B.....	9.50
3 to 3½ ft. B&B.....	11.95
3½ to 4 ft. B&B.....	15.00

hinodegiri

Hino Azalea

A—Flowers deep cerise-red, small, almost evergreen foliage. Low to medium habit.

12 to 15 in. B&B.....	5.95
15 to 18 in. B&B.....	6.95
18 to 24 in. B&B.....	9.50

hino—crimson

A—Same as above with true rich crimson flowers.

12 to 15 in. B&B.....	6.35
15 to 18 in. B&B.....	7.50

kaempferi

Torch Azalea

A—Foliage small, scarlet to crimson in fall. Flowers combination of red, pink, salmon, blend into a wonderful indescribable flame color; late May. A very graceful and attractive variety.

15 to 18 in. B&B.....	4.95
18 to 24 in. B&B.....	5.95
2 to 2½ ft. B&B.....	7.95
2½ to 3 ft. B&B.....	11.95

kaempferi hybrids—Numbered varieties

A—Dwarf semi-evergreen plants having beautiful range of colors. Excellent for many uses in the landscape, either in groups or as individual plants.

No. 3 — A low rounding bush. Flowers like Hinodegiri but larger, brilliant cerise-red, leaves most nearly evergreen of the hardy Azaleas. Choice.

No. 8 — Salmon-Vermilion. Blooms profusely. An improved "Fedora."

No. 10 — Medium-Vermilion. Late flowering, semi-evergreen.

No. 17 — Double, salmon-pink to true pink.

No. 18 — Double, pink with white blotches.

No. 19 — Single, brilliant deep pink, bushy.

WHITE AZALEAS

ledifolia alba

A—Medium height, late flowering.

Angela Place

Semi-evergreen. Dwarf. Pure white large flowers, very prolific.

Cantabile

Semi-evergreen. Dwarf. Early blooming with abundance of white flowers.

Frigid

Semi-evergreen. Dwarf. White flowers. Blooms freely.

Glacier

Semi-evergreen. Dwarf. Beautiful white flowers delicately tinged with a pale green tone.

Iceland

Dwarf, bushy habit. Flowers pure white, large.

Rose Greeley

Dwarf, bushy habit. Flowers white with trace of yellow.

Wilhelmina Vuyk (Pallastrina)

Semi-dwarf habit, white flowers with yellow center.

3 to 4 ft. B&B.....	3.95	
POTENTILLA <i>Gold Drop Cinquefoil</i>		
D—Flowers deep yellow from mid-May through August.		
15 to 18 in. container grown.....	2.50	
18 to 24 in. container grown.....	2.95	
PRUNUS glandulosa alba <i>White Flowering Almond</i>		
A—Every branch covered with small rosettes of double white flowers.		
18 to 24 in. container grown.....	2.95	
2 to 3 ft. container grown.....	4.35	

Each

PRUNUS—continued

glandulosa rosea *Double Pink Flowering Almond*

A—Small rosettes of pink flowers covering every branch in early May.

18 to 24 in. container grown..... 2.95

2 to 3 ft. container grown..... 4.35

triloba *Double Flowering Plum*

C—Large double pink flowers in early spring.

2 to 3 ft. container grown..... 3.95

3 to 4 ft. container grown..... 5.95

PYRACANTHA coccinea

coc. minute man *Minute Man Firethorn*

C—Hardy. Developed in Massachusetts by Waltham Field Station. Clusters of orange-red berries in fall.

15 to 18 in. container grown..... 2.50

18 to 24 in. container grown..... 3.50

2 to 2½ ft. container grown..... 4.50

2½ to 3 ft. container grown..... 5.95

3 to 3½ ft. container grown..... 7.50

coc. monrovia *Monrovia Firethorn*

C—Hardy. Orange-red berries in fall and winter. Long arching branches with lustrous green foliage.

18 to 24 in. container grown..... 3.50

2 to 2½ ft. container grown..... 4.50

2½ to 3 ft. container grown..... 5.95

3 to 3½ ft. container grown..... 7.50

RHODOTYPUS kerrioides *White Kerria—Jet Bead*

Light green foliage. White star flowers. May, June. Jet black berries.

2 to 3 ft. B&B..... 2.95

RHUS cotinus *Smoketree*

B—Small, thread-like grayish-purple flowers, June, July, give hazy, smoky appearance.

18 to 24 in. container grown..... 2.75

2 to 3 ft. container grown..... 3.45

3 to 4 ft. container grown..... 4.95

cotinus rubrifolia *Red Leaved Smoketree*

Red leaves. Grayish purple flowers. June, July.

18 to 24 in. container grown..... 3.50

ROSA hugonis *Hugonis Rose*

E—Arching branches. Large, single yellow flowers in June. Well fruited.

18 to 24 in. container grown..... 2.50

2 to 3 ft. container grown..... 2.95

rugosa *Rugosa Rose*

D—Leaves small, dark, glossy. Flowers single, red, June to October. Large scarlet hips. Excellent for seashore planting.

15 to 18 in. container grown..... 1.85

18 to 24 in. container grown..... 2.35

2 to 3 ft. container grown..... 2.95

Each

SALIX caprea

French Pussywillow

B—Finest variety. Silver pink catkins twice the size of our wild pussywillow.

2 to 3 ft. container grown.....	2.75
3 to 4 ft. container grown.....	3.45

SPIRAEA bumalda Anthony Waterer

Anthony Waterer Spirea

D—Flat bright crimson corymbs, July, August.

15 to 18 in. container grown.....	2.35
18 to 24 in. container grown.....	3.25
2 to 3 ft. B&B.....	4.35

froebelli

Froebel Spirea

D—Flat, bright crimson corymbs, July, August. Valuable for small flowering hedge.

15 to 18 in. container grown.....	2.25
18 to 24 in. container grown.....	3.00

WYMAN'S POTTED ROSES FOR 1961

Our selection of the best roses, based on our experience, and the 1961 American Rose Society ratings.

All American Rose selection winners are designated by AARS.

HYBRID TEAS

Hybrid Tea Roses are the most popular class of all. For the most part they are low-growing shrubs which flower from late May until fall frosts, the shape of the flower is superior and the color range wider than in other types. The following list includes the best of the varieties as of 1961:

ROSES—continued

	2 yr. Pots	3 yr. Container Grown Each
RED		
Charlotte Armstrong—AARS dark red and deep pink	1.95	4.95

PERENNIALS AND ANNUALS

Because our supply of perennials and annuals varies greatly from month to month we do not list them in this catalog. However, we stock hundreds of the best varieties.

We sell all of our annuals and vegetables in plant-bands. This assures you of a well-rooted, stocky plant. The cost is a little more, but anyone who has had plants in bands realizes their value.

GARDEN SUPPLIES

INSECTICIDES

Chlordane—5%

5 lbs.	1.50
25 lbs.	4.95
50 lbs.	8.95

OUR PLEDGE

We will endeavor to handle only the highest quality merchandise and offer it to our customers at a fair and reasonable price.

We will represent our products as honestly as possible in our advertising and avoid misleading and exaggerated statements.

We are dedicated to having and maintaining the best horticultural establishment in the country. We will handle only items pertaining to gardening, outdoor living, and home beautification. We will not stray into other fields of business regardless of how alluring they may be.

OUR GUARANTEE

We guarantee our plants to be:

1. Grown with the greatest skill and science that our 70 years of experience have taught us.
2. True to name. Any plants that are not true to name will be replaced cheerfully, as soon as possible and at the proper season. In the event that nursery stock is not true to name, we will, under no circumstances be liable for more than the invoice value at the time of purchase. We give no other or further warranty, expressed or implied.
3. Alive and in good healthy growing condition when they leave our Garden Centers.
4. Free from disease. We spend a great deal of time, money and effort every year in the eradication of insects and plant diseases. Our nurseries are regularly inspected and certified by the Massachusetts Department of Agriculture.
5. Dug properly. This work is done under the supervision of trained experts.

If plants are not as represented on arrival, notify us at once.

Our responsibility ends when you receive the plants in good condition. We cannot be responsible for them after they leave the Garden Centers as we cannot control planting conditions, weather and after care. Plants are perishable living organisms. You can guarantee their success by giving them proper care. Treat them well.

FREE LANDSCAPE DESIGN SERVICE

We are anxious to help you with your landscape problems, and suggest you take advantage of our free Landscape Design Service.

If you will come to our Garden Center and bring a sketch of your property, giving dimensions, and photographs if possible, our landscape designers will lay out a planting plan "Planscape" for you. After agreeing on the design, you then have the advantage of seeing the plants recommended, and also selecting and tagging your own plants. In this way there can be no disappointment later on. We will then deliver them to you at no extra charge provided you live within 20 miles of our Garden Center.

Our experience with this method has resulted in more satisfied customers than the conventional method, where a salesman looks at your property, makes a plan and then returns to your home and sells from the plan. We have found that too few people know enough about types of plants and the quality to be able to buy them confidently without seeing the plants.

We have actual landscape plantings set up at our Garden Center to help you visualize how your planting will look. There is a trained landscape designer on duty at all times who will be pleased to help you.
